SUMMARY

I'm a passionate and practical cybersecurity enthusiast with hands-on experience in Active Directory attacks, web app pentesting, and growing expertise in red teaming. I focus on simulating real-world attacks to help organizations find and fix security gaps. I believe in learning by doing and I aim to deliver meaningful results through ethical hacking while continuously sharpening my skills and promoting a culture of security awareness.

WORK EXPERIENCE

- Jr. Pentester (Intern), Byte Capsule** April 2025- May 2025
- Lead a team of nine people through labs and real-life scenarios, and make all of the final vulnerability findings that were shown to mentors.
 - Found possible weaknesses in lab simulations and bug bounty-style projects by using structured reporting and fixing methods.
 - I learned how to use SIEM, ISO/IEC 27001, and cloud security through internal training and threat detection activities. This helped me get ready for jobs that involve working with clients.

SKILLS

- Penetration Testing: Recon, Scanning, Enumeration; Web vulnerabilities testing
- Operating Systems: Kali Linux, Windows Tweaks, OS configuration
- Scripting & Automation: Python, Java, Bash automation for recon & workflow
- Web Security / Bug Bounty: WHOIS, DNS, OWASP basics, Vulnerability Scanning
- Cybersecurity Tools & Networking: Nmap, Shodan, Maltego, Burp Suite, SQLmap, TCP/IP, Traceroute

CERTIFICATE

- **EHP (Ethical Hacking for Professional) from Byte Capsule – ISO 27001**
Advanced hands-on training in real-world ethical hacking, AD attacks, and professional pentesting.
- **CNSP (Certified Network Security Practitioner) from SecOps Group**
Focused on core network security, firewall management, and IDS/IPS implementation.

EDUCATION

- Diploma in Engineering** March 2023 - Present

Jessore Polytechnic Institute

- Studying programming, networking, and cybersecurity as core subjects.
- Learning red teaming and ethical hacking alongside academics.

- Electronics** Jan 2020 - Sep 2022

Jessore Technical School & College

- Completed 2-year training focused on circuits and hardware.
- Built strong technical basics that support my CSE learning.
