SUMMARY

I'm a practical IT and networking enthusiast with hands-on knowledge of routing, switching, network troubleshooting, SOHO networking, and firewall configuration, alongside experience in Active Directory, web security, and penetration testing. I focus on resolving network issues and securing systems to help organizations maintain reliable, secure IT environments while continuously improving my technical skills.

WORK EXPERIENCE

Jr. Pentester (Intern), Byte Capsule **April 2025- May 2025**

- Lead a team of nine people through labs and real-life scenarios, and make all of the final vulnerability findings that were shown to mentors.
- Found weaknesses in lab simulations and bug bounty projects using structured reporting and remediation.

PROJECT

Enterprise Hotel Network Infrastructure

- Designed and simulated a multi-floor enterprise network connecting 100+ endpoints, multiple routers, VLANs, IP phones, IoT devices, and centralized servers.
- Configured OSPF routing, IP addressing and subnetting, DHCP, VoIP, and extended ACLs to control network access and isolate sensitive resources.

Site-to-Site VPN Implementation

- Configured a site-to-site VPN to establish secure communication between separate networks.
- Practiced VPN configuration, network connectivity verification, and troubleshooting.

SKILLS

- **Networking & Security:** TCP/IP, Subnetting, Static/Default Routing, RIP, OSPF, Multi-Area OSPF, EIGRP, BGP, Route Redistribution, VLAN, Inter-VLAN Routing, ACL Configuration, Network Troubleshooting, Palo Alto Firewall Setup & Configuration
- **IT Support & Hardware**: SOHO Networking, File & Printer Sharing, Ethernet Cable Termination, PC Assembly/Disassembly, Hardware & Software Troubleshooting, Windows Installation, Backup & Recover
- **Cybersecurity & Penetration Testing:** Reconnaissance, Scanning, Enumeration, Web Application Security, OWASP, NTLM, SMB, Kerberos.
- **Operating Systems & Active Directory**: Windows, Windows Server 2016, Active Directory User Management, Group Policy, Kali Linux
- **Scripting & Tools:** Python, Java, Bash, Nmap, Burp Suite, SQLmap, Wireshark, MS Office

CERTIFICATE

- **EHP (Ethical Hacking for Professional) from Byte Capsule – ISO 27001**
- **CNSP (Certified Network Security Practitioner) from SecOps Group**
- **IT Support Service Level-3 & Level-4 from NSDA**

EDUCATION

Diploma in Engineering **March 2023 - Present**

Jessore Polytechnic Institute

- Studying programming, networking, and cybersecurity as core subjects.

Electronics **Jan 2020 - Sep 2022**

Jessore Technical School & College

- Completed two-year training in electronics, circuits, and hardware.
